CLAIMS:

Please amend the claims as follows:

Sub 2F
at F1
1. (Amended) A method for transmitting information from a server to a client station
in a mobile-based client-server system, comprising the steps of:
determining that the server has information to be transmitted to a client station; and
transmitting a message from a transceiver associated with the server to a transceiver
associated with the client station, the message indicating that the server has information for the
client station.

Sub
at C2
3. (Amended) The method of claim 2, wherein the connection between the client
station and server [in] is established via the respective client station and server transceivers.
